

Searching for Query Examples

Follow this guide for tips and tricks on finding an existing query example to suit your needs.

Query Examples Page

purpose. There may be additional
listed first and queries written for ne
ies may not work in new versions.

VISIT THE QUERY EXAMPLES PAGE

The Query Examples page lists queries Open Dental has written in the past that are accessible to all users.

SET CATEGORY LIMITS

Filter the queries listed by setting Category Limits in the "Return Queries About" area. Only queries matching all selected categories will display.

No Category Limit

Hide Query Details

HIDE QUERY DETAILS

Click **Hide Query Details** to make searching query titles easier. This hides the query text and only shows titles and notes.

USE CTRL + F

Use the CTRL + F keyboard shortcut to bring up the search function to search for keywords.

Ctrl + F

742 Total production by assista

Once you've found a query that will work, click the number to open the query text. CTRL + A to select all text.

PASTE THE QUERY INTO OPEN DENTAL

Go to Reports, User Query and paste the query text into the User Query window. Add any variables and click **Submit Query** to get query results. **TIP:** Add to Favorites to save to query for future use.
